I have observed some confusion wrt submission of assignments. I would like to clarify that the Deans mail stands with immediate effect. You will not face any deductions if you don't make any submissions till the 31st of May.

Thank you!

Anish Ambavat Apr 15, 2021 12:16 PM Hi @everyone,

There is generally a lot of awkwardness/silence in the CPC class. Is it because the class is not understood or is it something else?

At any rate, let me know if there are any concerns as such. I will try to resolve them for sure.

Thanks!

Please take note:

- 1) Tomorrow's CPC class will be conducted from 14:00-15:00 instead of the regular class timings. This should help you study for the Thermo test.
- 2) On the coming Tuesday (27th April), we will have a small evaluation for CPC in the regular class timings. The syllabus for the test is whatever topics were covered after the 1st test.

Hello @everyone, this announcement is for the course CH1140.

As described by Suhanya ma'am we will have to solve and submit assignments in groups of 2 or 3. You will work with members of your group to discuss and solve problems assigned to your group.

The below google form is to be filled by one person from each group only. He/she may do so by the 15th of March. Groups can be made across branches and years, there are no limitations on the same.

The form can be edited after filling so you may change your groups before a new assignment arrives. Make sure you are present in no more than one group.

Thank you:)

It will start by 10:15 (officially 10:30) on 29th and continue up til 12. Lectures to be covered are 10,11,12 and 13.

Please do attend from now on and do let me know if you want a lec cancelled/postponed/preponed. Mass-bunks(even accidental ones) don't reflect well about our class.

Next, tentatively the date of exam for ICE will be on Saturday, 6th of February. I don't there should be any issues with this.

Assigns will be uploaded in the evening today which might not need submission but if not solved actively might force sir to ask for submissions. (edited)

Hello @everyone,

I have been observing that many of us are having an existential crisis because of the Applied Chemistry course.

Also, I have understood that despite all the crying and whining over the course, none of us has addressed our doubts to sir himself. I cannot allow this to continue in this manner. Take note and ask your doubts at the end of lecture, during the lecture whenever you feel there is a discrepancy. If he objects, I'll take care of it. Let's just not fuck this course up.

If we don't ask doubts, we are at fault..not him.

Also, this is not a joke. (edited)
